

Providing 24/7 Clinical Coverage

Our new telehealth partner enables us to provide 24/7 access to clinicians to all of our residents. This innovative program has shown a major reduction in unnecessary acute transfers and readmissions while also improving outcomes and increasing resident and family satisfaction.

When a patient is in need of immediate medical care, with the touch of a button, one of our nurses can contact a specially trained clinician through secure video and text messaging. This service allows for immediate care and attention to be given to the resident any time, day or night.

Program Benefits

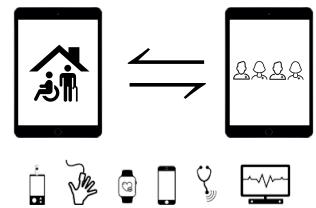

- ✓ Maximize all benefits for value-based and insurance programs
- ✓ Eliminate care gaps
- ✓ Gain better visibility to patients
- ✓ Improve care quality
- ✓ Manage higher acuity patients
- ✓ Improve patient and family satisfaction
