

## Wound Care

### Benefits of partnership with Wound Professionals Services:

- Communication between care team and patient's Primary Physician
- Collaborative efforts with Wound team, facility nursing, dietary and rehab team for optimal healing

### Miller's daily oversight:

- Minimum of Daily nursing assessment on patients
- In depth nursing assessments to be pro-active and patient needs
- Lab work drawn on site as ordered by physician to monitor healing
  - Labs for example: Albumin levels, CMP
- In-house physical and occupational therapies
  - Advanced therapy equipment to aide promotion of healing such as
    - Ultrasound, diathermy, e-stimulation (not available at all locations)
- Dietary oversight for optimal nutritional support
- Nursing to help with management of co-morbid conditions
